PROFILE

Product-focused Software Devloper who ships fast and builds for impact. I turn ideas into **scalable, production-ready systems** and obsess over the details that make software **reliable, efficient, and secure**.

Building **PioWorker at Piovation GmbH**, spanning UI/UX, backend connectors, and code execution; automated QA with **Playwright, Jenkins, and Grafana**, cutting manual testing by **~90%**. Built **Electronicx GmbH's** return automation handling **€520K+ across 5,000+ returns**, saving **2,000+ staff hours**. Previously developed **Studdy-Buddy** using **Gemini AI and RAG**, and **AptiDude's MERN examination platform** with real-time anti-cheating detection.

3+ years building. I don't chase trends - I build **systems that work. 0 → 1 → 100. Head down, code up, goal clear.**

PROJECTS

Studdy-Buddy
Next.js, Tailwind, Drizzle ORM, Gemini AI, Stripe, Inngest
- Built an AI-powered study platform that generates **notes, flashcards, quizzes**, and **Q&A** from any topic using **Google Gemini AI**.
- Integrated **Stripe payments, Clerk auth, YouTube API, course marketplace**, and **credit-based access** with full **user dashboard**. Used **Inngest** for background jobs and workflows. **(Repo link)**

YMGS Pharmacy
MERN Stack, Vite, Tailwind CSS
- Built a full **e-commerce platform with frontend, backend, and admin panel** for online pharmacy management.
- Features include **multi-gateway payments, guest checkout, blog CMS**, and **order tracking** with **dashboard control. (Repo link)**

HTTP Server
Go (Golang), HTTP/1.1
- Built a basic **HTTP/1.1 server** from scratch in **Go**, capable of handling **multiple concurrent clients**.
- Implemented **request parsing, response handling,** and learned core concepts of **low-level networking** and the **HTTP protocol. (Repo link)**

FaceQuest
Python, Telegram Bot, Face Recognition
- Built a face recognition system that finds matching faces from a dataset via a Telegram bot.
- Included **selfie verification, multi-user support** and **database-backed** search history. **(Repo link)**

PROFESSIONAL EXPERIENCE

Software Developer
Piovation GmbH
10/2025 - Present | Grasbrunn, Germany
- Build **PioWorker**, an AI workflow automation platform, developing **backend connectors**, **custom code execution**, and a revamped frontend for smoother workflow configuration.
- Automate **end-to-end testing with Playwright and Jenkins**, reducing manual testing by **~90%**; deliver **Grafana dashboards** for team-wide visibility into test results.

Software developer
Electronicx GmbH
10/2024 - 09/2025 | Hindenburgstr, Germany
- Automate return processing and fraud detection for **5,000+ returns worth €520K+**, reducing manual effort by **~90%** and saving an estimated **2,000+ staff hours**.
- Build analytics, notifications, and scraping microservices with **Node.js, FastAPI, Docker, and GitHub Actions**; deliver secure dashboards with **JWT authentication and WebSockets**.

Full Stack Developer Intern
AptiDude
02/2024 - 09/2024 | Kharagpur, India
- Build a **MERN examination platform** with **real-time anti-cheating detection**, **JWT authentication**, and **multi-tenant access**.
- Develop admin tools for **test creation, user management, and performance analytics**.

SKILLS

Languages: JavaScript, Go (Golang), Python, SQL | **Testing & DevOps:** Playwright, End-to-End Testing, Docker, Jenkins, GitHub Actions, CI/CD, Grafana, Git | **Frontend:** React, Next.js, Tailwind CSS | **Databases:** MongoDB, MySQL, Mongoose, Drizzle ORM | **Backend:** Node.js, FastAPI, Microservices, WebSockets, JWT Authentication | **Automation:** BullMQ, Inngest, Workflow Automation, API Integrations

EDUCATION

B.Tech Computer Science and Engineering CSE (AI & ML) 2023 - 2025
Khwaja Moinuddin Chishti Language University
